1. 授業の概要 Course Overview

Universal Health Coverage (UHC) is an important element of the global health agenda in ensuring that all people obtain necessary health services without financial hardship. Moreover, ageing of the population is a continuing problem around the world regardless of the each individual country's level of development. This means that UHC must be achieved in a world facing both demographic and epidemiological transitions. With regard to discussions on UHC in ageing societies, a simple focus on the elderly population is insufficient. We need a grand social design to promote the reforms necessary to overcome changes related to the ageing population. A wide range of public health skills and knowledge is required to support a cross-spectral approach to achieving UHC through a better understanding of good practices.

The purpose of this course is to provide students with an understanding of the global health agenda in terms of Universal Health Coverage, particularly in an ageing society. Japan is one of the countries experiencing a rapid growth in the elderly population. Through a combination of in-class lectures, discussions, and site visits, we would like to use the situation in Japan as a case study of how UHC can be achieved in an ageing society.

2. 授業の到達目標 Objective of the course

This course is designed to meet the following GIOs and SBOs.

General Instructive Objectives (GIOs)

- (1) To understand the current state of UHC and population ageing in Japan and around the world
- (2) To identify the stakeholders and their role in achieving UHC
- (3) To develop effective strategies for achieving UHC in an ageing society

Specific Behavioral Objectives (SBOs): Participants can

- (1) Describe the background and trends to setting the global agenda on UHC
- (2) Understand the statistical data related to demographic and epidemiological transitions.
- (3) Define and provide an overview of UHC in Japan and around the world.
- (4) Perform stakeholder analysis and explain each stakeholder's role in achieving UHC, particularly in a local setting.
- (5) Understand the policies and projects related to UHC in Japan from multiple perspectives, such as the health insurance system, health human resources, health financing, regulation, social welfare, community development, and other relevant areas.
- (6) Develop effective alternative strategies for achieving UHC in an ageing society in their own region or countries.

3. 成績評価の方法および基準 Evaluation

In-class discussion 70%, Final report/presentation 30%

4. 教科書・テキスト Textbook

Reading materials will be announced for registered participants in April.

5. 参考書 Recommended readings

- (1) World Health Organization. World Health Report 2010: Health system financing: the path to universal coverage
- (2) World Health Organization. *World report on ageing and health*. Geneva: WHO; 2015
- (3) WHO/World Bank Joint report. Tracking universal health coverage: 2017 global monitoring report.

6. 事前事後学修の内容およびそれに必要な時間 Expected time to accomplish homework assignments

- Prepare to explain the overview of health system in your country
- 15 hours preparation will be necessary for all the sessions.

7. その他履修上の注意事項 Others

- Understand the relation between this class and overall curriculum policy.
- The final schedule including a social event will be announced in April.
- Extra group work will be assigned to complete the course.
